SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

1. Project Overview

Lifeline 360 will be developed as an integrated healthcare platform providing multiple essential services through a single ecosystem, including doctor consultation, nursing/caretaker services, ambulance booking, medicine delivery, laboratory services, and blood bank services. The platform will support multi-language access, membership plans, calling support, and real-time service tracking. The core concept is based on bringing multiple healthcare services together on one platform.

2. Application & Panel Structure

The platform will consist of:

1. User Mobile App
2. Driver / Ambulance App
3. Medicine Vendor + Nursing/Caretaker App
4. Blood Bank Panel
5. Laboratory Panel
6. Master Admin Panel
7. Lifeline 360 Website

Doctor Panel and Hospital Panel are excluded from the current scope.

3. User Mobile Application

Registration & Profile

- Mobile number + OTP login
- User profile
- Multiple address management

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Emergency contact
- Language selection
- Notification preferences
- Booking/order history

Healthcare Services

The User App will provide access to:

- Doctor Consultation
- Medicine
- Nursing/Caretaker
- Ambulance
- Laboratory Tests
- Blood Bank
- Membership

The five primary healthcare services in the original concept include doctor, nursing, ambulance, laboratory and medicine services.

4. Medicine Vendor + Nursing/Caretaker App

A single application will be provided for both Medicine Vendors and Nursing/Caretaker partners, with role-based access.

Medicine Vendor Module

- Vendor registration/login
- KYC/document verification
- Pharmacy profile
- Medicine catalogue
- Medicine categories

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Vendor registration/login
- KYC/document verification
- Pharmacy profile
- Medicine catalogue
- Medicine categories
- Pricing and availability
- Order management
- Prescription order management
- Accept/reject orders
- Order preparation
- Delivery handover
- Order history
- Earnings/transactions

5.Nursing/Caretaker Module

- Caretaker registration/login
- KYC/document verification
- Profile and service details
- Service categories
- Availability management
- Nursing/caretaker booking requests
- Accept/reject booking
- Patient/service details
- Booking status
- Service completion
- Earnings/history
- Ratings & reviews

6. Driver / Ambulance App

A dedicated application will be developed for ambulance drivers.

Features

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Driver registration
- KYC/document verification
- Ambulance/vehicle details
- Online/offline availability
- Emergency booking requests
- Accept/reject request
- Pickup location
- Destination/hospital details
- Navigation
- Live GPS location
- Trip status
- Emergency booking history
- Earnings/transactions
- Notifications
- Call Masking

Call Masking

Users and drivers will be able to communicate through a masked calling system, allowing communication without exposing their personal mobile numbers.

7. Blood Bank Panel

A dedicated Blood Bank Panel will allow registered blood banks/partners to manage their availability and requests.

Features

- Blood bank registration
- KYC/document verification
- Blood bank profile
- Location/service area
- Blood group management
- Available blood units

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Availability status
- Blood request management
- Request acceptance/rejection
- User/requester details
- Contact/calling support
- Request history
- Notifications

User Flow

Select Blood Bank → Select Blood Group → Check Availability → Raise Request → Blood Bank Response → Confirmation

8. Laboratory Panel

The Laboratory Panel will manage diagnostic services and bookings.

Features

- Laboratory registration
- KYC/document verification
- Lab profile
- Test/category management
- Test pricing
- Packages
- Home sample collection
- Booking management
- Collection scheduling
- Booking status
- Report upload
- Digital report management
- User details
- Payment/transaction history
- Notifications

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

The platform will support home sample collection and digital report delivery, consistent with the original Lifeline 360 concept.

9. Membership Module

A Lifeline 360 Membership system will be available for users.

Features

- Monthly/annual membership plans
- Plan comparison
- Membership purchase
- Online payment
- Digital membership card
- Membership validity
- Benefits management
- Renewal
- Membership history
- Expiry notifications

Potential benefits can include consultation benefits, laboratory discounts and priority healthcare services, based on the membership concept in the source document.

10. Multi-Language Support

The platform will support multiple languages.

Features

- Language selection during onboarding
- Language selection from profile/settings Hindi or English
- Translation of app menus and interface
- Service categories
- Buttons and notifications
- Static content

The exact languages will be finalized before development.

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

11. Calling & Communication Support

Calling Support

- User-to-provider calling
- User-to-driver calling
- Calling for medicine orders where applicable
- Calling for nursing/caretaker bookings
- Blood bank communication
- Laboratory communication

Call Masking

For applicable service providers, calls will be routed through a masked number so that:

User's Number → Masked Calling System → Driver/Provider

Neither party will directly see the other's personal number.

12. Master Admin Panel

The Master Admin will have complete control over the entire platform.

Dashboard

- Total users
- Active bookings
- Ambulance requests
- Medicine orders
- Nursing bookings
- Lab bookings
- Blood requests
- Memberships
- Revenue
- Service-wise analytics

Management

- User management

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Driver/ambulance management
- Medicine vendor management
- Caretaker management
- Blood bank management
- Laboratory management
- Membership management
- Service/category management
- KYC/document verification
- Booking/order management
- Payments & transactions
- Commission management
- Offers/promotions
- Notifications
- Complaints/support
- Reports & analytics

13. Website

A responsive Lifeline 360 website will be developed.

Website Sections

- Home
- About Lifeline 360
- Healthcare Services
- Nursing/Caretaker
- Ambulance
- Medicine
- Laboratory
- Blood Bank
- Membership
- Partner/Vendor Registration

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Contact Us
- FAQs
- Privacy Policy
- Terms & Conditions

The website will act as the platform's public-facing information and service/partner onboarding channel.

14. Notifications

The system will provide notifications for:

- OTP
- Booking confirmation
- Ambulance request
- Driver assignment
- Nursing booking
- Medicine order
- Lab booking
- Blood request
- Report availability
- Membership purchase/expiry
- Payment
- Order/booking status
- Promotional notifications

15. Common Integrations

- Google Maps/GPS
- Payment Gateway
- OTP/SMS Gateway
- Push Notifications
- Calling & Call Masking API
- Cloud Storage
- Video Consultation integration, if required

SCOPE OF WORK

Scope of Work – Lifeline 360 Healthcare Super App

- Email notifications

Third-party API, calling, SMS, map, payment and cloud usage charges will be separate unless specifically included in the commercial proposal.

16. Overall User Flow

User Login
↓
Lifeline 360 Home
↓
Select Service

Medicine → Vendor → Order → Delivery

Nursing → Caretaker → Booking → Service

Ambulance → Driver → Emergency Request → Live Tracking

Laboratory → Test → Sample Collection → Report

Blood Bank → Blood Group → Availability → Request

Membership → Plan → Payment → Benefits

All activities will be centrally monitored through the Master Admin Panel.

17. Final Deliverables

- User Android & iOS App
- Driver/Ambulance Android & iOS App
- Medicine Vendor + Caretaker Android & iOS App
- Blood Bank Web Panel
- Laboratory Web Panel
- Master Admin Web Panel
- Lifeline 360 Website
- Backend & APIs
- Payment Integration
- Maps/GPS Integration
- Calling & Call Masking
- Multi-language Support
- Membership Module
- Notification System
- Deployment & Production Setup
